

Sunlyte LLC certifies the Digipak and CD components of the Oasis Zero Carbon Footprint Digipak™, which is manufactured entirely in-house by Oasis. Sunlyte also manufactures the Oasis BottleTray™, a component of the Oasis Zero Carbon Footprint Digipak™. Shipping is separately certified as carbon neutral directly through UPS.

To Whom It May Concern

Sunlyte LLC is authorized to use the Carbonfund.org Certified CarbonFree® label on CD/DVD/BD Packaged Discs product and packaging through 2011.

To achieve the CarbonFree® certified label, Sunlyte LLC has completed the Life Cycle Assessment (LCA) which calculates the carbon footprint of the CD/DVD/BD Packaged Discs. The LCA for the CD/DVD/BD Packaged Discs meets Carbonfund.org's CarbonFree® certified protocol and has been reviewed by Carbonfund.org's Technical Advisory Group for approval. This Technical Advisory Group approved the CD/DVD/BD Packaged Discs Life Cycle Assessment based on the following:

- Meets both ISO 140404 and WKI methodology standards.
- The CO₂ footprint of Sunlyte CD/DVD/BD Packaged Discs were evaluated for the complete "cradle to grave" lifecycle. This includes raw materials, manufacturing, upstream and downstream transport, use phase, end of life and packaging.
- The assessment was done using IPCC data.

In addition, Sunlyte LLC has agreed to offset the (per unit sales) carbon footprint of the CD/DVD/BD Packaged Discs with Carbonfund.org's third party validated carbon offset projects.

Sincerely,

Eric Carlson
President
